

Features of the WaterJet High Rate Sand Filters

- All filters constructed of corrosion free materials
- All filters virtually maintenance free
- Range of sizes to suit all requirements
- All multiport valves supplied complete with barrel unions
- Multiport valves have automatic internal air venting
- All tanks have 5 year warranty*
- All multi port valves have 1 year warranty*

Series 20

MODEL No.	TANK DIA. (mm)	HEIGHT INC. VALVE (mm)	VALVE SIZE (mm)	FILTER AREA (sq.m)	FILTER MEDIA (kg)	MAX FLOW (lpm)	MAX. WORKING PRESSURE (kpa)

For the brightest, cleanest water, use Waterbrite, a unique Australian filter material.

1. Waterbrite's unique microscopic pores trap and hold quantities of contaminants, reducing backwashing and saving water.
2. Again, because of its lighter, porous structure, Waterbrite allows water to flow through more freely, so reducing pump pressure and saving on electricity consumption.
3. Waterbrite's unique ion-exchange process actually absorbs ammonia, thus minimising chloramine contamination formation and reducing chlorine demand.

* Warranties extendable under certain circumstances.
